

## **Key Features**

1. Intrusion Detection System based on security Events analyzer
2. Alerts in case of changing IP Address Table or Routing Table
3. Ms RPC Auditor
4. Sun RPC Auditor
5. Security Event Log Monitor
6. Network Monitor
7. NetBIOS Auditor
8. MS SQL Server Auditor
9. SNMP Auditor
10. Packet Filter
11. LM/NTLM Spider (NTLMv1 support and recovering LM passwords, NTLM password recovering and NTLMv2 support will be available in the next releases )
12. Abuse address finder
13. RBL ( spammer realtime black list ) check
14. Packet Editor ( IP, ICMP, TCP, UDP, NETBIOS-SSN packet decoding )
15. Security Events Alerter
16. Port Scanner
17. Web Proxy CGI Scanner
18. Remote System OS detector
19. Services Probe
20. Ping ( ICMP, TCP, UDP )
21. Trace Route
22. Finger
23. Whois
24. DNS Lookup
25. Email Validate
26. Tcp, Udp tools ( Client / Server, Port redirector )
27. Local IP, TCP, UDP and ICMP statistics
28. Local Addressing information table
29. Local Net to media information table
30. Process detail discoverer
31. Report Generator

32. IP Address / ASN Country lookup
33. IP Routing, Net Table
34. MAC/Vendor Lookup
