Host Range and Credentials Selection Dialog

This dialog allows you to select a specified host or a range of Ip addresses. Select the host name in the **Host Name** field, or an **Ip Range** by filling **Start** and **End** Ip addresses. The dialog allows you to select three different types of credentials: **Null Session**, **Current Credentials**, **Other Credentials**.

Note that you are allowed to use fields **User Name** and **Password** only for other credentials and the user name should be in "Domain\account" format .

The screenshot shows a dialog box titled "Host Range and Credentials Selection Dialog". It is divided into two main sections: "Select Host Range" and "Select Credentials".

Select Host Range:

- There are two radio buttons. The first, "Host Name/Address", is selected and has a text box containing "192.168.0.132".
- The second, "Ip Range", is unselected and has two text boxes: "Start" containing "192.168.0.132" and "End" containing "192.168.0.132".

Select Credentials:

- There are three radio buttons: "Null Session" (selected), "Current Credentials", and "Other Credentials".
- Below the radio buttons are two text boxes: "User Name" and "Password".
- A note at the bottom of this section reads: "NOTE: Specify the user name in the format 'DOMAIN\account' or 'account' for using current domain name".

At the bottom of the dialog are two buttons: "OK" and "Cancel".
